WORK EXPERIENCE

Front-End Developer • ZeptoLab • Oct 2022 – current

- Developed an internal tool to track Google Play and App Store ratings, as well as crash/ANR rates, using **Nest.js**, **Postgres**, **Prisma**, and **React** (all fully typed with **TypeScript**).
- Built and launched careers.zeptolab.com, a new website for job openings, using **Gatsby.js** and styled-components (also in **TypeScript**), enhancing the candidate experience and streamlining the hiring process.
- Currently developing internal tools for the Player XP and other teams using **TypeScript**, **React**, **Redux**, **GraphQL**, **Apollo Client**, **Nest.js**, **Material UI**, **Chakra UI**, improving team productivity and enabling data-driven decision-making.
- Collaborated with cross-functional teams to deliver cutting-edge solutions that meet business objectives and exceed user expectations.

Player XP Team Lead • Tilting Point • Dec 2020 – Jul 2022

- Built and led high-performing teams, delivering exceptional player experiences.
- Aligned team goals with business objectives and industry best practices.
- Implemented technology and automation, resulting in cost savings and improved player satisfaction.
- Mentored new team members and drove team success.

Project Manager • Plarium • Aug 2019 – Dec 2022

- Led ChatBot project to improve Customer Support productivity.
- Implemented machine learning tool for Google Play reviews, increasing processed reviews by 66%.
- Gathered project requirements with stakeholders.
- Established optimized work schedules using agile methodologies.

Community Management General Lead • Plarium • Aug 2019 – Dec 2022

- Assisted the director in leading and managing a team of 53 members, promoting collaboration and teamwork.
- Improved team processes, increasing productivity, efficiency, and customer satisfaction.
- Developed and implemented strategic plans for department growth and success.
- Provided regular reports and analysis on departmental performance to facilitate data-driven decision-making.
